

READ, RENEW, REPEAT

Summer Reading Activity

Magnifying Lens

Materials:

- 2-liter plastic bottle
- scissors
- cup of water
- spoon or eyedropper
- newspaper or magazine

Instructions:

With an adult's help, cut a 3" circle from the top of the bottle, to make a "lens." Hold the lens over the magazine. Can you read the text easily? Next, add a small spoonful of water to the lens, and read the text again. Does it look different?
